Frontend Engineer

I'm a Frontend Engineer with a strong foundation in React, TypeScript, and modern web technologies, coupled with over a year's experience in developing intuitive, responsive, and performance-driven web applications. Proven track record in improving code quality, reducing errors by 40%, and developing scalable web solutions. Skilled in HTML, CSS, JavaScript, Next.js, and Tailwind CSS, with a keen eye for detail honed by an accounting background. Known for writing clean, maintainable code and adaptable to new technologies, as demonstrated through projects like CutFitt_URL and GitRepo.

Professional Experience

HNG TECH INTERNSHIP, Nigeria (Remote)

Jul 2024 - Sep 2024

Frontend developer, Lagos

- Developed front-end components using React.js and ensured cross-browser compatibility.
- Developed an e-commerce website ([timbu-shop](#)) using Timbu API at the HNG11 internship.
- Participated and performed all the tasks in the HNG11 internship from all stages.
- Wrote well-designed, and testable code.
- Wrote reusable codes and components that enhanced development efficiency.
- Worked with a three-person web engineering team to design and develop websites.

ALTSCHOOLAFRICA, (ALTHUB), Nigeria (Remote)

Group Project – Fronted developer, Lagos

- I established a peer review system within a group of 7 members, improving code quality and reducing errors by 40%; this initiative streamlined the feedback process and enhanced overall project efficiency within 2 months.
- Through this experience, I gained collaborative skills and learned a great deal while building the app with Reactjs.
- I have had the opportunity to assist fellow developers with their projects and review their code, this experience has broadened my knowledge of key coding concepts and best practices.
- I have also tested and detected bugs before launches, gaining additional knowledge and inspiration.

Projects

CutFitt_URL, [Link](#)

It is a Url Shortening service that allows you to shortend any long Url to a manageable and user-friendly link. CutFitt_URL helps you to create branded short links to share your brand identity, custom slugs and domain customization options and generate QR-code to reinforce your brand presence and enhance user engagement. This is my AltSchool Africa capstone project, built with Nextjs and Typescript.

GitRepo, [Link](#)

It is a web application designed to seamlessly fetch and display a user's github repositories by leveraging the Github API. I ensure that users can easily access and manage their repositories directly from our platform. Built with Reactjs.

TimeZone, [Link](#)

It is a simple web application that allows users to view the current time in different timezones around the world. Built with Html, Css and Js.

Core Competencies

Web Development HTML, CSS, Javascript, React.js, Vue.js, Next.js, Tailwindcss, TypeScript

Version Control Git and Github, version control

Software Development npm, firebase, agile software development methodology

Problem Solving Excellent problem-solving skills, analytical thinking

Collaboration Good communication skills, ability to work in a team environment, Adaptability, quick learning of new technologies, Time management, project prioritization

Certifications

[Certificate of Proficiency](#), HNG Tech

[Deep Teaching Solution](#), Coursera

[Certificate of Completion](#), Aptlearn

[Certificate of Completion](#), Nodejs

[Certificate of Completion](#), Ingressive4Good X Zuri

Education

AltSchool Africa, Lagos, Nigeria, Diploma in Software Engineering

- Completed Diploma in Software Engineering with a focus on frontend development techniques, including HTML, CSS, JavaScript, React, Typescript, Nextjs.
- Achieved top 10% of the class in Technical Proficiency, reflecting a strong grasp on software engineering principles and frontend coding standards.
- Two times circle lead for second and third semester, enhancing my communication and collaboration skills, which are essential for effective teamwork within a development team.

National Open University, Lagos, Nigeria, B.Sc in Accounting

- Graduated with a Bachelor's degree in Accounting, developing strong analytical and problem-solving skills critical for maintaining data accuracy and integrity.
- Completed coursework in Financial Accounting, Managerial Accounting, and Auditing, equipping with a comprehensive understanding of data organization and management.
- Led a peer study group of 20+ students, enhancing communication and collaboration skills essential for working effectively within a development team.
