Frontend Engineer

I am a passionate Frontend Engineer with a solid foundation in React, TypeScript, and cutting-edge web technologies. With over a year of hands-on experience, I specialize in crafting intuitive, responsive, and high-performance web applications that elevate user experiences. My track record speaks for itself, I've successfully improved code quality and reduced errors by 40%, while developing scalable web solutions that meet diverse client needs. Proficient in HTML, CSS, JavaScript, Next.js, and Tailwind CSS, I bring a meticulous attention to detail—honed through my background in accounting, to every project. I also write clean, maintainable code and adapting swiftly to new technologies. My portfolio includes impactful projects like CutFitt_URL, EasyServe, and Renergy-Hub, where I demonstrated my ability to deliver results that drive business success.

Professional Experience

INTERNPULSE INTERNSHIP, Nigeria (Remote)

Oct 2024 - Dec 2024

Frontend developer, Lagos

- Implement responsive and interactive user interface using Typescript and React.
- Collaborated With UX/UI designers to translate design mockups into functional, high-quality code.
- Ensured cross-browser compatibility and optimized web applications for performance.
- Maintained and updated existing codebases to improve functionality and efficiency.
- Participated in code reviews, providing constructive feedback to peers to maintain code quality and standards.
- Debugged and resolved issues in a timely manner to ensure smooth user experiences.
- Successfully implemented a responsive and user-friendly website ([reenergyhub](#)) interface, enhancing user engagement and accessibility.

HNG TECH INTERNSHIP, Nigeria (Remote)

Jul 2024 - Sep 2024

Frontend developer, Lagos

- Developed front-end components using React.js and ensured cross-browser compatibility.
- Developed an e-commerce website ([timbu-shop](#)) using Timbu API at the HNG11 internship.
- Participated and performed all the tasks in the HNG11 internship from all stages.
- Wrote well-designed, and testable code.
- Wrote reusable codes and components that enhanced development efficiency.
- Worked with a three-person web engineering team to design and develop websites.

ALTSCHOOLAFRICA, (ALTHUB), Nigeria (Remote)

Group Project – Fronted developer, Lagos

- I established a peer review system within a group of 7 members, improving code quality and reducing errors by 40%; this initiative streamlined the feedback process and enhanced overall project efficiency within 2 months.
 - Through this experience, I gained collaborative skills and learned a great deal while building the app with Reactjs.
 - I have had the opportunity to assist fellow developers with their projects and review their code, this experience has broadened my knowledge of key coding concepts and best practices.
 - I have also tested and detected bugs before launches, gaining additional knowledge and inspiration.
-

Projects

EasyServe, [Link](#)

EasyServe platform is a revolutionary web application that seamlessly connects clients with skilled artisans. Whether you need a handyman, a tailor, or a tech expert, the web-app solution makes it easy to find and collaborate with the perfect artisan for your needs. Built with ReactJs and Typescript

RenergyHub, [Link](#)

Renergy Hub is a digital marketplace that connects sellers and buyers of renewable energy products, like solar panels, batteries, and wind turbines, facilitating secure transactions, reliable deliveries, and seamless purchasing. The platform empowers businesses and consumers to adopt sustainable energy solutions more easily by centralizing the sourcing, payment, and distribution of eco-friendly products.

CutFitt_URL, [Link](#)

It is a Url Shortening service that allows you to shorten any long Url to a manageable and user-friendly link. CutFitt_URL helps you to create branded short links to share your brand identity, custom slugs and domain customization options and generate QR-code to reinforce your brand presence and enhance user engagement. This is my AltSchool Africa capstone project, built with Nextjs and Typescript.

Core Competencies

Web Development: HTML, CSS, Javascript, React.js, Vue.js, Next.js, Tailwindcss, TypeScript

Version Control: Git and Github, version control

Software Development: npm, firebase, agile software development methodology

Problem Solving: Excellent problem-solving skills, analytical thinking

Collaboration: Good communication skills, ability to work in a team environment, Adaptability, quick learning of new technologies, Time management, project prioritization

Certifications

[Diploma in Frontend Engineering](#), Altschool Africa

[Finalist Certificate of Completion](#), InternPulse

[Certificate of Proficiency](#), HNG Tech

[Deep Teaching Solution](#), Coursera

[Certificate of Completion](#), Nodejs

Education

AltSchool Africa, Lagos, Nigeria, Diploma in Software Engineering

- Completed Diploma in Software Engineering with a focus on frontend development techniques, including HTML, CSS, JavaScript, React, Typescript, Nextjs.
- Achieved top 10% of the class in Technical Proficiency, reflecting a strong grasp on software engineering principles and frontend coding standards.
- Two times circle lead for second and third semester, enhancing my communication and collaboration skills, which are essential for effective teamwork within a development team.

National Open University, Lagos, Nigeria, B.Sc in Accounting

- Graduated with a Bachelor's degree in Accounting, developing strong analytical and problem-solving skills critical for maintaining data accuracy and integrity.
- Completed coursework in Financial Accounting, Managerial Accounting, and Auditing, equipping with a comprehensive understanding of data organization and management.
- Led a peer study group of 20+ students, enhancing communication and collaboration skills essential for working effectively within a development team.
